Summary

- Currently, I am a Postdoctoral Researcher at Purdue University working with Prof. Christopher G. Brinton and Prof. Mung Chiang. My research work focuses on designing communication networks for connected intelligent systems.
- I received my Ph.D. degree in Electrical Engineering from Auburn University, AL, USA. I was Research Assistant and Teaching Assistant at Auburn University from Aug. 2018 to May. 2024.
- My Ph.D. work started a new research area called “Remote Inference,” a crucial part of Next-G wireless networks. I developed a novel information-theoretic tool to evaluate the importance of information freshness on remote inference and designed low-complexity optimal scheduling algorithms.
- I contributed to AI for Agriculture interdisciplinary and cross-university education and research between Auburn University and Tuskegee University, by mentoring a junior Ph.D. student from Tuskegee University, teaching machine learning labs to Auburn and Tuskegee graduate and undergraduate students in the Applied Statistics and Machine Learning course, and leading the research on a USDA project “AI-based Food Demand Forecasting for Alabama Food Pantry” in collaboration with Tuskegee University.
- I maintained a web page that contains a list of the research papers about the Age of Information.
